

Zephyr Class - Autumn 1

This is Your Life!

Rationale

By collecting and compiling information to write their own small information books about their lives, they will have the opportunity to develop their enquiry skills and information processing and selection.

The children will use different sources to find out about places, events and people who have featured in their lives so far, as well as finding out about growth, movement and healthy living - the physical aspects of their life.

How Can You Help?

With your child, see if you can find some early pictures/photographs/artefacts from their life or your own - to enter out 'Guess the Baby' quiz!

Discuss and note down your early memories of things they've said and done, and their own.

Help your child to have some idea of the sequences of events - what order they happened in and how old they were when things happened.

Key Skills

Enquiry(finding out)

Improving our work

Working with others

Creative thinking
